DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 79-81 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 79 "the outside" lacks antecedent basis. It is unclear in this instance what "outside" references ("outside" of the element, system, apparatus, environment, etc.).

Inasmuch as these claims are able to be understood in light of the 112 rejections made above, the following rejection(s) directed thereto apply:

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2872

3. Claims 71,72,82 and 83 are rejected under 35 U.S.C. 102(b) as being anticipated by Sawaki et al.

Sawaki shows a diffractive element in fig. 8 with a light shielding member(33c, etc.), including Cr/Cr oxide, at the periphery thereof.

Regarding claim 83, the wavelength used with the element was not given significant patentable weight since such does Not further limit the present invention in a structural manner.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 73-81,84 and 85 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sawaki et al.

Regarding claims 73,74,77,78,80,81,84 and 85, although not taught by Sawaki, exposure devices and methods therefore are well known in the art. It would have been obvious to the ordinarily skilled artisan at the time of invention to use a

known prior art exposure device or method with the claimed diffraction element in order to enable manufacture of a semiconductor wafer or apparatus.

Regarding claims 75 and 79, Sawaki does not teach the specific materials for the light shielding member as set forth in these claims (note columns 4,6 and 17 for a discussion of the materials used for this member). However, each of these materials is well known in the art and would have been obvious art-recognized equivalent materials to those disclosed by Sawaki for the purpose of shielding unwanted light.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Meyers and Burger show optical elements including light shielding members.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will

Art Unit: 2872

expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
